

## HUIERJIE NEWS RELEASE

**Senior management team from Huierjie ARG FIBRE Company Xiangyang, China attend GRCA International congress in Dubai – Client Company wins major award**

Huierjie Glass Fibre Company supplied more than 80 tons of AR glass fiber spray roving's top produce 17,000 m<sup>2</sup> cladding for this prestigious project in China manufactured by Nanjing Beilida New materials System Engineering Co, Ltd.

**May 1, 2015** Xiangyang City, Hubei, China: The senior management team from Huierjie Glassfibre Company including General Manager Yang Xing Ming and Marketing & Sales Director Lickey Lee attended the recent GRCA International congress, as participating event sponsors held at the Radisson Blu hotel, Dubai Deira Creek, Dubai, UAE April 19-21, 2015.

The event was attended by delegates from around the world representing all aspects of the GRC manufacturing industry and Huierjie was delighted to participate as a new GRCA member planning to attend many new upcoming events to promote its new Huierjie Company image, brochures, technical materials, including test reports and quality manuals as well as the pending launch of a new Company web site, expected next month.

Built on more than four decades of glass fiber manufacturing experience, Huierjie AR glass fibre is on track to become the foremost developer of alkali resistant glass fibre (ZrO<sub>2</sub> content) in China. Huierjie AR glass fiber currently dominates the China market and plans to become the leading one-stop service providers of the exporting AR glass fibre materials in key market around the world. Thereby being the preferred provider of safe and environmentally friendly, reliable cost effective AR glass fibre products, using services that can satisfy the needs of the most demanding specifications.

The Xiangyang Huierjie Glassfibre Company was established in 1970 and started to produce AR glassfibre from 1988. The main products included alkali resistant glassfibre continuous roving, premix chopped strand, water-dispersed chopped stand, plus many kinds of scrim materials widely used in architectural decoration, concrete cement fields, and external thermal insulation systems. Huierjie Glassfibre is located in the center of China in the famous historic and cultural city of Xiangyang, in Hubei Province, a convenient destination with transportation routes from Beijing, Shanghai, Guangzhou and Shenzhen.

The performance of Huierjie Glassfibre products has been extensively tested in China and Europe, confirming material properties to be equal to Cemfil® II and NEG products. Consequently Huierjie expanded its combined production facility capacity of 10,000 tons per year, becoming the largest AR Glassfibre producer in China and the second largest producer globally.

Huierjie Glassfibre Company guarantees the quality of raw materials, semi-finished and finished products. Each production process is carefully inspected and monitored by the QC department.

Production samples are measured via calibrated testing equipment in our laboratory and is sent annually to an international third party lab for further testing and verification. Daily in-house material testing is conducted in accordance with standard specifications for GRC materials, BSEN 15422: 2008 and ASTM C1666 / C 1666M-07. Advanced testing instrumentation, proven test methods plus tracking records are the guarantee of quality control and technical service which ensures a consistent quality product production process from materials purchase, manufacturing through to delivery and shipping.

*Always by your side – always innovating*
